Qualification achieved

On successful completion of this course, students are awarded the Master of Management Information Systems. The course meets the Australian Qualifications Framework specifications for a Level 9 master's degree.

Entry requirements

- Completion of an Australian Bachelor's degree or equivalent
- IELTS (Academic 6.5 overall or equivalent). No bands less than 6.0
- Statement of Purpose
- Résumé or CV

If you do not meet these requirements but have other qualifications or work experience, get in touch so we can review your options.

Assessment

A variety of assessments including examinations, written assignments and presentations.

Contact hours

Full-time students will typically receive 8 contact hours per week and will need to devote at least 40 hours (including contact hours) a week to study.

Who is this for?

The Master of Management Information Systems (MMIS) is ideal for aspiring tech leaders, business professionals, IT specialists, international students, and entrepreneurs who want to combine technology expertise with strategic management skills. It is designed for those seeking leadership roles, to advance their careers in digital systems and analytics, or use technology to drive innovation and business growth. If you are aiming for a career in any sector that depends on robust information systems to power decision-making and innovation, this course will give you the edge.

What will you learn?

- Strategic IT Management – how to align technology initiatives with business goals for competitive advantage
- Business Analytics and Data-Driven Decision-Making – leveraging data to inform strategy and solve complex problems
- Cybersecurity and Risk Management – protecting organisational assets and ensuring compliance in a digital world
- Systems Design and Implementation – planning, developing, and integrating effective information systems
- Leadership and Project Management – leading cross-functional teams and delivering technology-driven projects successfully
- Emerging Technologies and Innovation – exploring AI, cloud computing, and other cutting-edge tools shaping the future of business

Why choose this program?

- Blend of Business and Technology – gain expertise in both IT systems and strategic management to excel in leadership roles
- Industry-Relevant Curriculum – learn skills aligned with current market demands, from cybersecurity to business analytics
- Global Career Opportunities – prepare for roles across industries worldwide with a qualification recognised internationally
- Practical, Real-World Learning – work on industry projects and case studies to apply knowledge directly to workplace scenarios
